

Pit Refurbishment

Give your vehicle pit a 'good as new' makeover

REFURBISHMENT

Premier Pits have been manufacturing pre-fabricated vehicle maintenance and inspection pits for over 25 years. There are now over 1800 installations across the UK and Ireland.

The pits are hard wearing and built for every day use, but over the years they are bound to look a little worn and dirty. However, unlike pits built from reinforced concrete or bricks and blocks, they lend themselves to cost effective refurbishment - making them look as "good as new".

BEFORE

AFTER

What the refurbishment package includes:

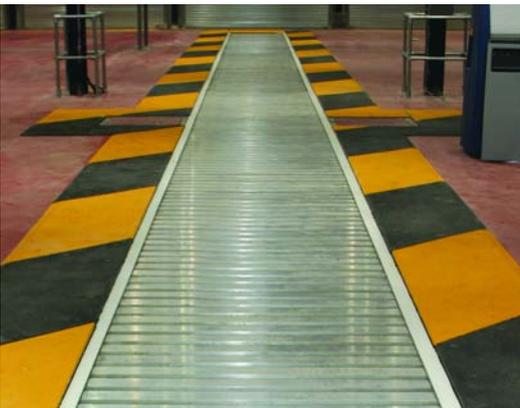

- Cleaning
- Preparation for painting
- Re-painting
- Replacement light lenses
- Options to update

Benefits

- Enhanced workshop appearance
- Greater efficiency
- Better working conditions

HEALTH AND SAFETY OPTIONS

Pit refurbishment offers a good opportunity to improve safety. We now offer a comprehensive range of health and safety accessories, including:

- Motorised Personnel Safety Covers
- Budget Safety Cover
- Retractable Flag Barriers
- Ball Type Handrails
- Painted Floors
- Jackrails with yellow and black tape
- Safety Lights

PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF
PREFABRICATED VEHICLE PITS.

WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values

Working/maintenance pits

Inspection pits
