

Premier Pits Global Package

Over the last few years Premier Pits have delivered and installed their high quality, technically advanced pits in Africa, Asia, The Middle East, mainland Europe and Scandinavia.

The wide and varied experience gained has enabled the company to develop a package that provides international customers with cost effective, efficient maintenance pit solutions, while at the same time taking into account local market conditions and requirements.

The **Premier Pits Global Package** includes:

- Detailed drawings to match individual market and customer demands
- The choice of European wide-bodied or standard UK pits
- A range of inbuilt and free standing accessory options
- Several safety alternatives
- A choice of pit finishes
- Optimal use of container space to minimise transport costs
- Delivery to the docks or site
- Full installation or supervised installation available by experienced Premier Pits staff
- Other product options, including washdown pits and ramps.

PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF
PREFABRICATED VEHICLE PITS.

WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

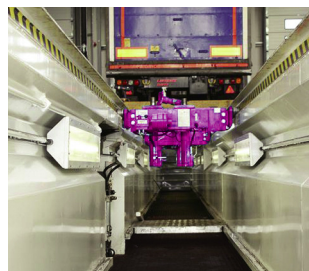

WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values

Working/maintenance pits
