

# Under chassis washing made simple by Premier Pits

The following methods are designed to help coach, bus and truck operators improve their vehicle cleaning methods and MOT inspection preparations. Each option meets individual space and cost requirements.

**OPTION 1**

## 10M GALVANISED WASHDOWN PIT

**OVERALL YARD SPACE REQUIRED - 10M**  
**BENEFIT** – Both the automatic and manual wash are easily installed.

**OPTION 2**

## GALVANISED HALF WASHDOWN PIT / HALF RAMP

**OVERALL YARD SPACE – 19.5M**  
**BENEFIT** – There is no need for a fence to be erected around the equipment.

**OPTION 3**

## GALVANISED FULL RAMP

**OVERALL YARD SPACE – 28.2M**  
**BENEFIT** – This option is designed to take up to 8 tonnes per axle.

Premier Pits also offer a Rainwater Harvesting system. This involves collecting the rainwater off your building roof for use in all your vehicle washing.

Each option can be tailored to suit your individual needs.

# PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF  
PREFABRICATED VEHICLE PITS.

## WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

## WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

## WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

## WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values

Working/maintenance pits

Inspection pits
