

Vehicle Support Unit **NEW**

Patent application no. 0821214.4

The Vehicle Support Unit, developed by Premier Pits joins its varied product range after extensive R&D. Primarily it is a support for the traditional pit jack but can also act as an alternative to a jack.

Various pit jacks require additional mechanical support, this is because they have no lock off collars.

The Premier Pits' unit offers this mechanical support.

The unit allows you to vary the height of the vehicle by adjusting the vertical support props.

Additionally, it works with a wide variety of vehicles including both buses and HGVs.

If you have limited use for a pit jack or view them as too expensive, this unit with a conventional bottle jack is an ideal alternative.

Benefits

- Fits to any pit
- Full height adjustment
- No maintenance costs
- Easy to use
- Budget cost

PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF
PREFABRICATED VEHICLE PITS.

WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values
