

A unique understanding of commercial vehicle pits

Over the years Premier Pits have supplied a vast number of companies involved in the manufacture, maintenance and inspection of commercial vehicles. These include local and national transport operators, truck manufacturers, local authorities and VOSA inspection centres. As a result we have developed an unrivalled knowledge and understanding, within the UK and Ireland, of the commercial vehicle sector.

WHERE WE MAKE A DIFFERENCE

DESIGN FLEXIBILITY

Although all our pits are built around a standard basic format they can be tailored to suit individual customer needs, making available an endless range of combinations.

WORKSHOP EFFICIENCY

The design and improved working conditions contribute towards increased throughput and quality.

MULTIPLE INSTALLATIONS

Our approach cuts the cost and reduces the time needed to install several pits at the same time.

INSPECTIONS/TESTING

Our inspection/testing pits comply to VOSA standard + working on 24 hour operations.

QUALITY CONTROL

To ensure that it is built to the specification agreed with the client, every pit is closely monitored as it passes through our workshops. Pits are manufactured to ISO 9001 standards.

WORKSHOP SAFETY

We can provide a full range of safety equipment, from barriers through to a motorized safety cover.

PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF
PREFABRICATED VEHICLE PITS.

WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values
