

A unique understanding of the Coach & Bus sector

Over the years Premier Pits have supplied a vast number of coach and bus operators across the UK and Ireland, from small independents through to the largest public and private national operators. As a result we have developed an unrivalled knowledge and understanding of the sector.

WHERE WE MAKE A DIFFERENCE

DESIGN FLEXIBILITY

Built to accommodate the special width, depth and length requirements of buses and coaches.

MODERN BUSES

Our pits are suited to working on the latest bus designs, with their lower chassis and variable entry heights with single or double pits.

MULTIPLE INSTALLATIONS

Our approach cuts the cost and reduces the time needed to install several pits at the same time.

WORKSHOP EFFICIENCY

The design and improved working conditions contribute towards increased throughput and quality and encourages quality technicians.

INSPECTIONS/TESTING

Our inspection/testing pits comply to VOSA standards on all classes.

QUALITY CONTROL

To ensure that it is built to the specification agreed with the client, every pit is closely monitored as it passes through our workshops. Pits are manufactured to ISO 9001 standards with a quality paint finish.

WORKSHOP SAFETY

We can provide a full range of safety equipment, from barriers through to a motorized safety cover.

PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF
PREFABRICATED VEHICLE PITS.

WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values
