

ATF/ATL Testing

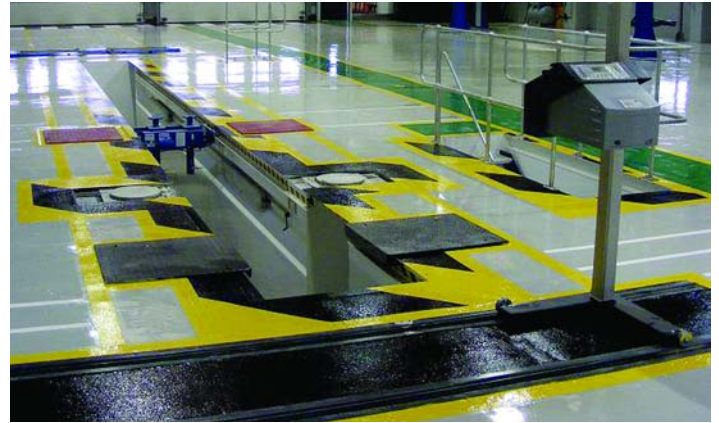

- choose Premier Pits

Premier Pits offer quality and the most effective solutions for all your VOSA testing requirements using **YOUR** choice of equipment.

The release of the long awaited VOSA ATF contract and guidelines has provided Premier Pits with the opportunity to progress with their ATF/ATL product range.

BENEFITS OF PREMIER PITS

- 32 years experience in design, manufacture and installation of pits
- Entry and exit tunnels with anti slip treads
- Premier Safety Lights – zone 2, virtually unbreakable
- Motorised safety cover and budget safety cover
- Guaranteed delivery on time and on budget
- Good working relationship with specifiers and main contractors.

THE ATF/ATL PACKAGE

Choosing **YOUR** choice of equipment, Premier Pits can offer a full turn-key solution from concept through to completion. This includes planning, building regulations, design, building construction, prefabricated pits and commissioning.

PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF
PREFABRICATED VEHICLE PITS.

WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values
