

Transforming engine and rolling stock maintenance

Premier Pits prefabricated steel maintenance pits make a significant contribution towards enhancing workshop productivity and can cut pit installation times by 70-80%.

PRODUCT FEATURES INCLUDE

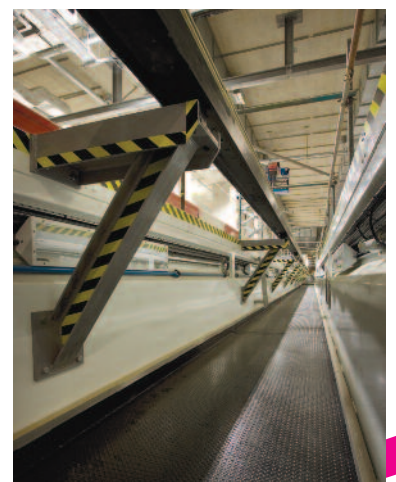

- Fully welded steel construction incorporating steel reinforcement for tying into the floor slab.
- Site specific structural calculations.
- Galvanised finish.
- Built in services such as safety lights and air lines.
- Manufactured and installed to very tight tolerances.
- Full range of safety products available.
- Under chassis and bogey wash down option.

BENEFITS

Architects, engineers, construction companies and users all benefit from Premier Pits Rail Pits.

- Designed to suit users' requirements can be an integral part of floor slab structure.

- Reduced installation times - up to 70-80% when compared with in situ poured concrete.
- Quantifiable more accurate costings from initial concept through to installation.
- Tolerances are much tighter due to the use of laser measuring systems in the factory and on site during installation.
- Water tight – the welded construction ensures there is no water ingress or leakage.
- Improved lighting - high quality safety lights are fitted at Premier Pits factory. LED lights available.
- Better working conditions for staff as a result of no water ingress, easier cleaning and good quality lighting.
- With no leakage of pollutants possible the pits are more environmentally friendly.
- Being easier to clean and refurbish pit maintenance costs are lower.

PremierPits®

PREFABRICATED VEHICLE PITS

THE UK'S LEADING MANUFACTURER AND INSTALLER OF
PREFABRICATED VEHICLE PITS.

WHAT IS A PREFABRICATED PIT?

Premier Pits' prefabricated pits are manufactured from steel in a modern factory, under strict quality control conditions, then delivered in one piece direct to site ready for installation. While under construction the pits are fitted with the accessories and extras specifically requested by customers.

WHY CHOOSE A PREMIER PIT?

We have manufactured and installed approximately 3000 prefabricated pits for a vast range of different clients. This has enabled us to develop the unique **PREMIER PITS PACKAGE**, which involves everything from help with initial concept through to commissioning.

WHERE ARE THEY USED?

Typical users include:

- Transport and logistics companies
- Coach operators
- Bus companies
- Train and tram operators
- Airports for tow tugs etc.
- Designated testing stations

WHAT ARE THE BENEFITS OF USING PREFABRICATED PITS?

There is a vast range of benefits for the operator, the specifier and the contractor, some of the key ones are:

- Installation savings
- Greater workshop efficiency
- Improved working conditions
- Enhanced workshop safety
- Watertight
- Increased property values
